

The most efficient white hat link building strategies

Q: I know that in the last 30 days my competitor dogfish.com has been running a marketing campaign, and many domains that hadn't previously linked to it did so. I would like to know how many links my competitor was able to get from the domain with the highest Authority Score among these newly linking domains.

A: Go to Backlink Analytics → Backlinks report --> use filter “new” → Sort by AS

Q: How many backlinks are there for the page

<https://www.s7.ru/ru/blog/cto-mozhno-vzyat-v-ruchnuyu-klad/> (here can be any URL)

A: Go to Backlink Analytics → fill

<https://www.s7.ru/ru/blog/cto-mozhno-vzyat-v-ruchnuyu-klad/> → report Overview will show you the amount of backlinks

Q: How many backlinks are there for nike.com? Are there any site wide links? Are there any sponsored links? How many? How many of those appeared in the last 30 days?

A: go to Backlink Analytics → type nike.com → use Backlinks report → use filter new + sponsored

Q: Locate the domain with the highest AS that has a backlink to nike.com. Are there any backlinks to nike.com from domains that belong to News Journalism & News Industry category?

A: go to Backlink Analytics → type nike.com → get to the referring domains report → sort by AS → use filter “category” and tick the “News Journalism & News Industry”.

Q: How do I find websites that have backlinks to my competitors (washingtonpost.com, cnn.com, reuters.com), but not to my website (usatoday.com)?

A: Use Backlink Gap tool, then type in usatoday.com и all the competitors, use filter “Best”, and the report will show the websites that refer to your competitors but not to you.

Q: Elena starts a campaign to develop a link profile for her client. Now she is looking for new relevant domains in the Sports category.

A: go to Backlink Analytics, type in your competitor’s domain, then use referring domains report and sort by category. This way you can find all the websites from the Sport category that referred to the competitor.

Q: Carl just got a message from Google saying that a pattern of unnatural, artificial, deceptive, or manipulative links pointing to his site has been detected. What does It mean for Carl’s websites? Is he going to lose his potential clients, or will his sites be turned off? How can he evaluate the toxicity level of his backlink profile?

A: To locate toxic backlinks, setup Backlink Audit. Then proceed with overview report which will show the toxic score of your profile. Then go to Audit, where you will be able to see to all toxic backlinks sorted by Toxic Score. After that, you can download those

links in the csv file in order to upload them to the Google Disavow tool. Alternatively you can directly transfer them to the “remove” list and start outreaching website owners asking them to delete the link.

Q: Damian is a beginner in SEO. He recently read an article about “Broken Link Building” tactics, which involves finding broken external links on other websites in your niche, reaching out, and recommending your own content as a replacement. He bought a subscription for Semrush and wants to see if it is possible to implement this tactic using our tools. Is there anything that can help? If yes, what are the main functionalities in the tool that Damian should use to achieve his goal?

A: go to Backlink Analytics, use the report “Indexed Pages”, use filter “target URL error.” This way you can find broken competitor pages that are still being referred to by websites. After that you can outreach those website owners and offer them your own content instead of the broken competitors’ one.

SERP SEO
